Client

CUDAP, the Cornell University Deaf Awareness Project

- a club under SAFC and the Public Service Center
- created 7 years ago when there was an emergency situation in Ithaca and someone needed an interpreter, but there was none available
- a Cornell student stepped in who was not certified, and thus CUDAP was founded.

Purpose

Mission:

1. Work to integrate the Deaf and hearing communities.
2. Work to provide an opportunity for students to learn about the Deaf community and American Sign Language (ASL) through meetings, service trips, and events, while educating the Cornell campus and the greater Ithaca community to facilitate a better understanding of the Deaf community.
3. Aim to incorporate ASL into the school-year curriculum at Cornell University.

Goals

- CUDAP will be using their website to:
  - Appeal to target audiences
  - Display information about program offerings
    - Increase awareness of the deaf community
- We would like to create a website that:
  - is user-friendly
    - can be updated easily with an admin feature
  - promotes more interaction with their program for students, club members, and Ithaca residents
    - announce events, teach some basic signs, and provide contact information

Target Audiences

1. CUDAP E-Board
2. CUDAP members
3. Potential CUDAP members
4. Anyone interested in learning more about the ASL and the deaf community

Needs & Wants

- About
- E-board
- Calendar
- Place to share resources
- Ability to update site

Admin

Admin Settings

- Provides an accessible and user-friendly way for board members to update information on the website
- Accessed through a hidden login portal
- Functionality includes:
  - Adding/removing board members, and changing board member info
  - Adding/removing photos from gallery
  - Uploading new PowerPoint slides

Future Plans

- Admin page with forms
- Fill gallery and signs pages
- Tags for feed and gallery
- Embed google calendar (client version)
- Embed social media on home page
